

# NExT Oil and Gas Software Training

Hands-on training for Schlumberger software

## APPLICATIONS

- Training for Schlumberger platform and foundation software

## BENEFITS

- Maximize the return on your software investments
- Adopt technology faster and use more advanced software capabilities through hands-on training
- Reach higher levels of productivity with advanced or workflow-focused courses

## FEATURES

- Hands-on training for Schlumberger software
- Combined domain and software courses, focusing on industry challenges such as deep water, shale reservoirs, and heavy oil
- Global NExT training centers offer courses in state-of-the-art facilities
- Private courses can be delivered at your offices
- Custom courses can be tailored to your workflows

Today, Oil & Gas companies face numerous challenges, not only due to the complex hydrocarbon environments they need explore and produce, but also the requirement to keep their technical staff trained to successfully approach those challenges.

NExT\*, a Schlumberger company, is dedicated to the professional development of E&P industry professionals. NExT accelerates the development of oil and gas professionals through competency management services, training programs, classroom instruction, mentoring, technical domain courses, and software training.

## Training for today's complex challenges

Schlumberger provides the latest in oil and gas software, and understands that technology adoption can be a huge challenge. Through NExT, we provide hands-on software training as well as combined domain and software training, applied to relevant industry challenges such as deep water, shale reservoirs, and heavy oil.

*Hands-on training enables geoscientists to take full advantage of the advanced features and deep science behind Schlumberger software.*

NExT training on Schlumberger software allows you to maximize the return on your software investment by accelerating technology adoption among your technical staff. NExT offers software training that meets the needs of professionals with varying levels of experience, empowering them to reach higher levels of productivity with workflow-focused courses.

# NExT Oil and Gas Software Training

NExT offers hands-on training for the following Schlumberger software:

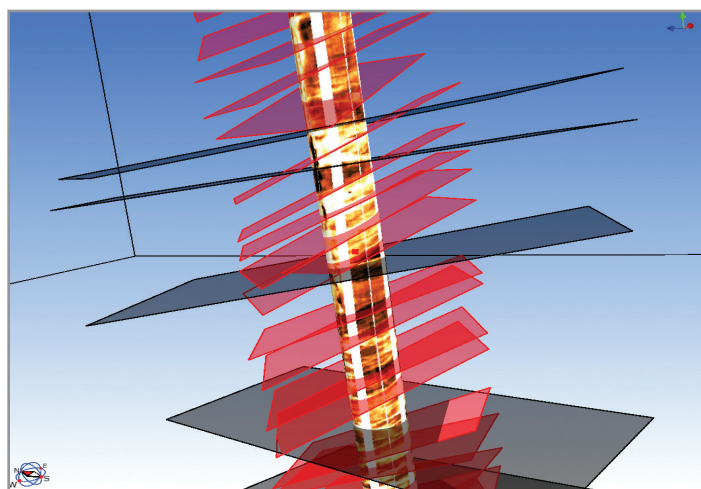

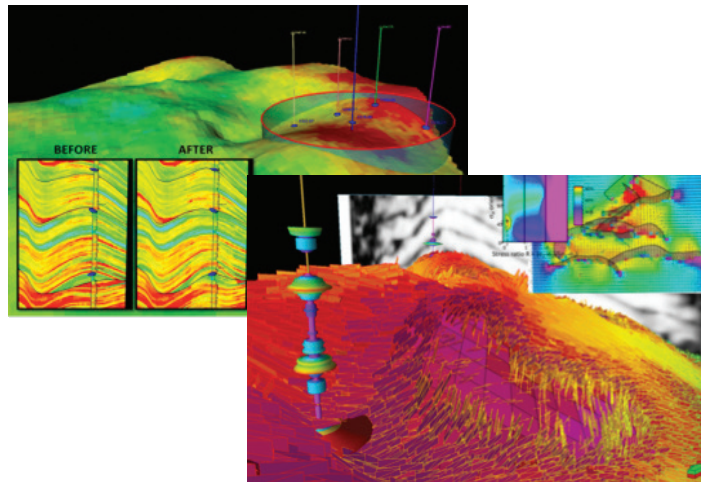

## Platform software

- Avocet\* production operations software platform
- Ocean\* software development framework
- Petrel\* E&P software platform
- Studio\* E&P knowledge environment
- Techlog\* wellbore software platform

## Foundation software

- Drillbench\* software
- ECLIPSE\* industry-reference reservoir simulator
- GeoFrame\* reservoir characterization software
- GeoX\* exploration risk and resource assessment software
- InnerLogix\* data quality management solution
- INTERSECT\* next-generation reservoir simulator
- Malcom\* software
- MEPO\* multiple realization optimizer
- Merak\* planning, risk, and reserves software
- OFM\* well and reservoir analysis software
- OLGA\* multiphase flow simulator
- Omega\* seismic data processing software
- PetroMod\* petroleum systems modeling software
- PIPESIM\* production system analysis software
- ProSource\* E&P data management and delivery system
